

The NEW 0881 Relaxation System Motion Recliner

. . . So put up your feet, lean back, and relax - let Concordian Chesterfield's Visions in Motion line of recliner furniture provide the comfort and practicality you've been searching for. The premier name in recliner upholstery today, Concordian Chesterfield's Visions in Motion line of recliner furniture offers the benefits of a chair and ottoman combination without taking up a large volume of space.

Incorporating a unique micro-processor based controller conveniently located in the top of the arm, Concordian Chesterfield's "Relaxation System Motion Recliner" is easily activated by the simple touch of just one finger for your immediate enjoyment.

Concordian Chesterfield's "Relaxation System Motion Recliner" is the perfect blend of therapeutic massage, cozy comfort, and contemporary style all rolled into one.

Our "Relaxation System Motion Recliner" provides contemporary styling featuring a quiet electro-mechanical pulsating motor massage system coupled with integrated dynamic heat controls all of which define the term "relaxation".

This unique massage product is scientifically designed and engineered to provide a "wave-like" massage over your body at selectable speed and intensities.
